The Sticking Point Solution

The Art of Critical Reading

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple

technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

Comic Connections

Book #2 in this highly illustrated middle-grade series explores what it means to be a team player Now part of the official junior roller derby league, the Derby Daredevils are ready to compete in their first tournament. Kenzie writes new game plays. Bree works on her speed. Tomoko sharpens her blocking skills. And Jules fearlessly hip checks everyone in sight. But Shelly isn't sure what she's best at. In hopes of taking home the tournament's Star Skater award, Shelly designs extra-special gear for the Daredevils. But not everything works as well as Shelly imagined, and she can't get the team on board. Without the gear, how will Shelly shine on the track? With high-energy illustrations from Sophie Escabasse and lots of roller derby action, Book #2 in the series explores individuality while hitting home what it really means to be part of a team.

Superheroes and Philosophy

A lyrical picture book biography of Janet Collins, the first African American principal dancer at the Metropolitan Opera House. Janet Collins wanted to be a ballerina in the 1930s and 40s, a time when racial segregation was widespread in the United States. Janet pursued dance with a passion, despite being rejected from discriminatory dance schools. When she was accepted into the Ballet Russe de Monte Carlo as a teenager on the condition that she paint her skin white for performances, Janet refused. She continued to go after her dreams, never compromising her values along the way. From her early childhood lessons to the height of her success as the first African American prima ballerina in the Metropolitan Opera, *Brave Ballerina* is the story of a remarkable pioneer as told by Michelle Meadows, with fantastic illustrations from Ebony Glenn.

JPRS Report

Businesses can plateau, stall, OR stagnate without the owners or key executives even realizing it. A business might be achieving incremental year-on-year growth

and yet still be in a situation of stagnation or stall. Why? Because entrepreneurs and executives often focus on the wrong things and don't know how to solve the problems that get their businesses stuck. The purpose of The Sticking Point Solution is to help entrepreneurs and executives recognize the ways in which their businesses may be stuck, and to then give them tools for getting unstuck and enjoying exponential growth. To achieve this, Jay will help you identify the nine "sticking points" that keep entrepreneurs and executives alike grinding just to survive, instead of growing and thriving. The results: freedom from stagnation and stalling; new levels of profitability and success; and a much greater sense of control and pleasure from running the enterprise. How to achieve this exquisite state is the impetus for The Sticking Point Solution.

Hunting Eichmann

From the listless repose of the place, and the peculiar character of its inhabitants,

who are descendants from the original Dutch settlers, this sequestered glen has long been known by name of Sleepy Hollow. A drowsy, dreamy influence seems to hang over the land, and to pervade the very atmosphere. Washington Irving

A Field Guide to Lies

A thought-provoking collection of essays explores the philosophical side of the comic book world, collecting the contributions of sixteen philosophers on a variety of subjects, including evil, justice, metaphysics, and the limits of violence. Original.

Thinking Skills

She could remember standing in a park near the falls, hypnotized by the sight and sound, and holding her father's hand as they took a walk that would lead them closer. That's what everyone wonders when they see Niagara . . . How close will their courage let them get to it? At the turn of the nineteenth century, a retired sixty-two-year-old charm school instructor named Annie Edson Taylor, seeking fame and fortune, decided to do something that no one in the world had ever done before—she would go over Niagara Falls in a wooden barrel. Come meet the Queen of the Falls and witness with your own eyes her daring ride!

Are You a Horse?

A highly illustrated middle-grade series that celebrates new friendships, first crushes, and getting out of your comfort zone Ever since they can remember, fifth-

graders Kenzie (aka Kenzilla) and Shelly (aka Bomb Shell) have dreamed of becoming roller derby superstars. When Austin's city league introduces a brand-new junior league, the dynamic duo celebrates! But they'll need to try out as a five-person team. Kenzie and Shelly have just one week to convince three other girls that roller derby is the coolest thing on wheels. But Kenzie starts to have second thoughts when Shelly starts acting like everyone's best friend . . . Isn't she supposed to be Kenzie's best friend? And things get really awkward when Shelly recruits Kenzie's neighbor (and secret crush!) for the team. With lots of humor and an authentic middle-grade voice, book one of this illustrated series follows Kenzie, Shelly, and the rest of the Derby Daredevils as they learn how to fall—and get back up again.

Risk Savvy

Previously Published as A Field Guide to Lies We're surrounded by fringe theories,

fake news, and pseudo-facts. These lies are getting repeated. New York Times bestselling author Daniel Levitin shows how to disarm these socially devastating inventions and get the American mind back on track. Here are the fundamental lessons in critical thinking that we need to know and share now. Investigating numerical misinformation, Daniel Levitin shows how mishandled statistics and graphs can give a grossly distorted perspective and lead us to terrible decisions. Wordy arguments on the other hand can easily be persuasive as they drift away from the facts in an appealing yet misguided way. The steps we can take to better evaluate news, advertisements, and reports are clearly detailed. Ultimately, Levitin turns to what underlies our ability to determine if something is true or false: the scientific method. He grapples with the limits of what we can and cannot know. Case studies are offered to demonstrate the applications of logical thinking to quite varied settings, spanning courtroom testimony, medical decision making, magic, modern physics, and conspiracy theories. This urgently needed book enables us to avoid the extremes of passive gullibility and cynical rejection. As Levitin attests: Truth matters. A post-truth era is an era of willful irrationality, reversing all the great advances humankind has made. Euphemisms like “fringe theories,” “extreme views,” “alt truth,” and even “fake news” can literally be dangerous. Let's call lies what they are and catch those making them in the act.

Daredevil

Hunting Eichmann is the first complete narrative of a relentless and harrowing international manhunt. When the Allies stormed Berlin in the last days of the Third Reich, Adolf Eichmann shed his SS uniform and vanished. Following his escape from two American POW camps, his retreat into the mountains and out of Europe, and his path to an anonymous life in Buenos Aires, his pursuers are a bulldog West German prosecutor, a blind Argentinean Jew and his beautiful daughter, and a budding, ragtag spy agency called the Mossad, whose operatives have their own scores to settle (and whose rare surveillance photographs are published here for the first time). The capture of Eichmann and the efforts by Israeli agents to secret him out of Argentina to stand trial is the stunning conclusion to this thrilling historical account, told with the kind of pulse-pounding detail that rivals anything you'd find in great spy fiction.

Brave Ballerina

Winner of the National Business Book Award From the New York Times bestselling author of *The Organized Mind* and *This Is Your Brain on Music*, a primer to the critical thinking that is more necessary now than ever We are bombarded with more information each day than our brains can process—especially in election season. It's raining bad data, half-truths, and even outright lies. New York Times bestselling author Daniel J. Levitin shows how to recognize misleading announcements, statistics, graphs, and written reports, revealing the ways lying weasels can use them. It's becoming harder to separate the wheat from the digital chaff. How do we distinguish misinformation, pseudo-facts, and distortions from reliable information? Levitin groups his field guide into two categories—statistical information and faulty arguments—ultimately showing how science is the bedrock of critical thinking. Inf literacy means understanding that there are hierarchies of source quality and bias that variously distort our information feeds via every media

channel, including social media. We may expect newspapers, bloggers, the government, and Wikipedia to be factually and logically correct, but they so often aren't. We need to think critically about the words and numbers we encounter if we want to be successful at work, at play, and in making the most of our lives. This means checking the plausibility and reasoning—not passively accepting information, repeating it, and making decisions based on it. Readers learn to avoid the extremes of passive gullibility and cynical rejection. Levitin's charming, entertaining, accessible guide can help anyone wake up to a whole lot of things that aren't so. And catch some weasels in their tracks!
